

MTP and Waste

Phil Dolley

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources

BREW Programme

- Business Resource Efficiency & Waste Programme – return landfill tax monies
- Improve business resource efficiency
- Variety of means including:
 - Advice and support
 - Remove barriers
 - Support innovation

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources

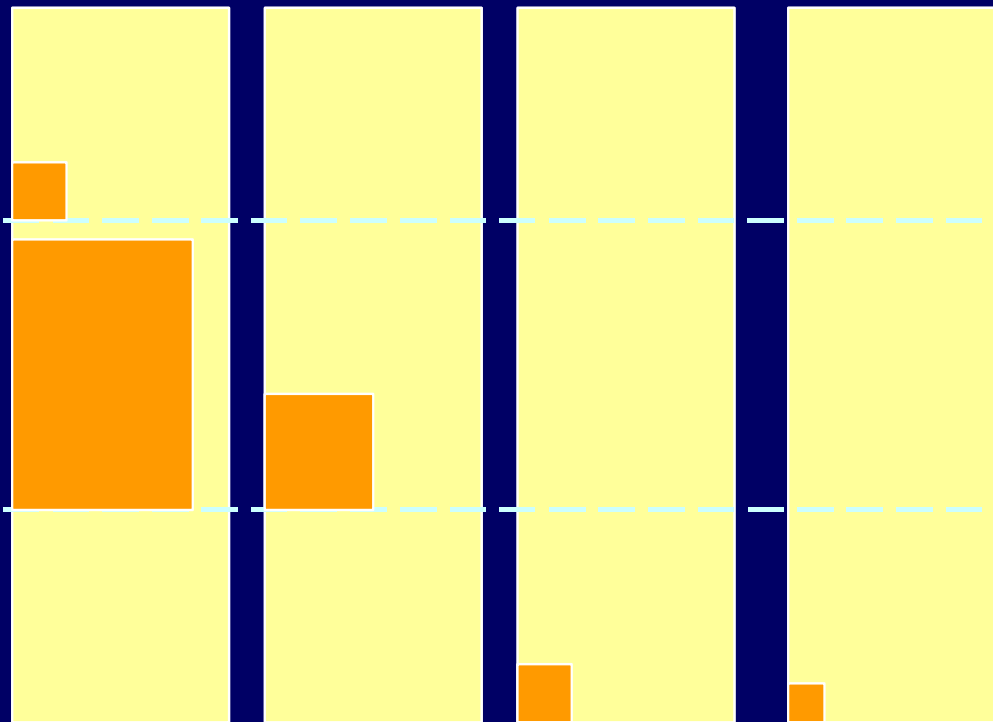

Present MTP activity

Energy Water Waste Chemicals

Production

Use

Disposal

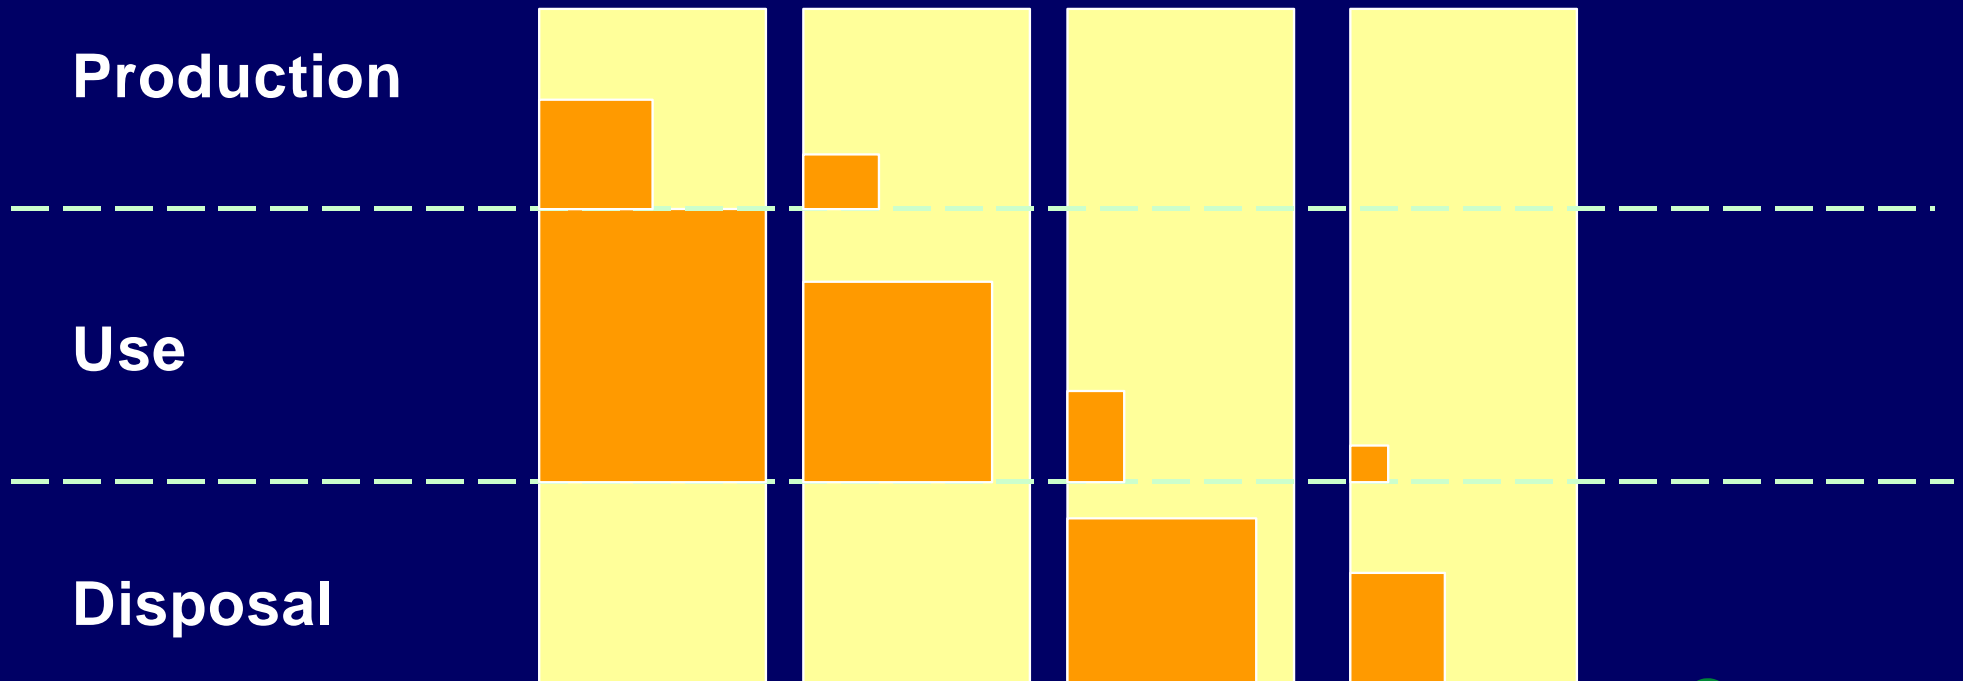

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources

Expanded MTP activity

Energy Water Waste Chemicals

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources

MTP – Part of a team

- Close links to following (and others)
 - Environment Agency - Priority Products and Hazardous Waste Programme
 - Defra Waste R&D Programme
 - European Topic Centre and EEA
 - Envirowise
 - WRAP
 - DTI

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources

MTP Activity

- Focus on MTP core strengths – unique identity;
 - Evidence base
 - ‘Risk assessment’ via projections.
 - Industry consultation
- Pragmatic – work on products core to present activity and affected by key policy drivers.
- Develop methods – then tackle other relevant non-energy products

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources

MTP Outcomes

- Help reduce the quantity of materials being sent to landfill
- Help identify barriers to greater recycling / reuse of materials and components
- Identify policy options to help secure the above

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources

Questions

- Is focus right?
- What are priorities?
 - Which products?
 - How to prioritise these?
 - Tonnes, haz materials, policy drivers

Market Transformation Programme

..... to bring forward products, systems and services which do less harm to the environment, using less energy, water and other resources
